Titusville, Pennsylvania, January 29, 2021 – Precision Profiles, LLC (the “Company”), a trusted manufacturer of high precision, tight tolerance OEM steam turbine components and other precision metal parts, today announced that the Company has been awarded ISO 9001:2015 Certification for its Quality Management System.

ISO 9001:2015 is a globally recognized quality management standard developed and published by the International Organization for Standardization (ISO). The standard is based on several quality management principles, including having a strong customer focus, involvement of high-level company management, an outlined process-based approach, and a philosophy of continuous improvement.

“Our team is very proud to have been awarded this prestigious quality certification”, noted Matthew J. Lucco, President & CEO. “The Precision Profiles culture is built on a commitment to deliver the highest quality precision machined components to our customers, on time and free of defects. The attainment of our ISO 9001:2015 certification validates our Total Quality System – and the commitment we have to product quality and customers satisfaction.”

The Company’s ISO 9001:2015 Certificate (#021030) was issued by SRI Quality System Registrar, a world-class, ANAB Accredited management system certification body. The scope of the Company’s certification includes the manufacture and supply of precision metal components. Activities at the Company’s headquarters (45727 State Highway 27, Titusville, PA 16354) are included in the scope of the certification. Robin Dudash of IQP&S (Butler, PA) served as the Company’s quality consultant and assisted management in performing a complete review of the Company’s Total Quality System prior to applying for certification.

About Precision Profiles, LLC:

Precision Profiles, LLC is a custom manufacturer that has been producing high precision metal components for over 25 years. The Company specializes in producing tight-tolerance turbine components for OEMs and other companies within the power generation industry. Our value proposition is simple: we deliver high-precision OEM turbine components at a lower cost than our competitors – and with shorter lead times. This reduces the overall cost incurred by our customers for turbine builds/repairs and increases their production capacity. In addition to manufacturing steam turbine components, Precision Profiles offers a full suite of machining services, including: multi-axis CNC milling & machining, turning, saw cutting, and wire EDM services. We are an employee-owned and operated company COMMITTED TO delivering high-quality, high-precision products to our customers, on time and free of defects.
